

Analyse de sentiment

Par Juliette Vaton Ce document s'inscrit dans le cadre du projet tutoré de l'un des groupes de la classe d'Année Spéciale de l'IUT Informatique LYON 1. Réunissant : DUFOUR Alexandre FERRAND Gérome LAURENT Jeremy MOUSSU Nathan VATON Juliette Ce groupe était placé sous le tutorat de M.VINCENT VIDAL. Ce document représente les travaux de Juliette Vaton, au sujet d'un programme de catégorisation de texte. A terme, le code inscrit dans ce document sera ré-employé dans un programme plus conséquent, réunissant les applications suivantes : Moteur de recherche (affecté à DUFOUR Alexandre) Détecteur de spams (affecté à LAURENT Jérémy) Analyseur d'opinion (affecté à VATON Juliette) Catégorisation de texte (affecté à FERRAND Gérome) Notre OBJECTIF : Le but de cette application est d'associer automatiquement des labels prédéfinis à des textes. Tout au long de ce document, nous allons tenter de mettre en place un programme d'apprentissage automatique, composé de différents classifieurs. Dans un second temps, nous allons essayer de l'optimiser, tout en prenant soin de conserver un équilibre entre over- et under- fitting.

Le dataset

Il s'agit d'un corpus de critiques de films en anglais, scindé en deux fichiers au format txt (endoage utf-8), chacun labellé "positif" et "négatif".
